Can God get more work done with a computer?

ROC Chairman's bio in
Who's Who in Religion

Non-Profit Computing has announced that its Co-Director, Ben Stock, chairman of the Religious Organizations Computing Group, has been elected to be a subject of biographical record in Who's Who in Religion, Fourth Edition, 1992 /1993, and listed in the Special Index Section of Who's Who in America, 47th edition. According to Sandra S. Barnes, President of the Marquis Who's Who Publication Board, "inclusion in Who's Who is limited to those individuals who have demonstrated outstanding achievement in their own fields of endeavor and who have, thereby, contributed significantly to the betterment of contemporary society."

Mr. Stock, a non-profit organizations consultant, specializes in computerization and management analysis. He has served as financial, management, and media analyst, and administrator for religious organizations on the national level.

about ROC
chairman
Ben Stock

He was a producer and publicist for Andy Warhol Films, president of The James Dean Memorial Foundation, Inc. and of Brainpower Research and Development Services, Inc., an educational organization founded by H. Marshall McLuhan to develop social programs to combine the energies of culture and technology. After a time as a Trappist monk, Mr. Stock was asked to found the Religious Organizations Computing Group for Non-Profit Computing.

about the
ROC Group

ROC, The Religious Organizations Computing Group, known as the ROC Group, provides technical and management assistance to religious institutions and schools for their related social action projects. Special programs developed by ROC provide literacy and computer training for inner city school children, and computerization for shelters, soup kitchens and food pantries.

Non-Profit Computing, Inc. (NPC), established in 1984, helps over 1000+ non-profit organizations to become more cost effective and self sufficient through the use of the internet and computers. NPC matches computer professionals as volunteers to work with non-profit organization staff who need to become computer literate or use advanced technology to support and enhance their work. All Non-Profit Computing services: clinics, consultants, recruiting, software and equipment donations, specialized technical and management assistance, are offered free of charge.
